

Ultra Petroleum Refining Complex

Technologies & Systems

*Lowering the Capital and Operational &
Maintenance Costs*

Universal Technologies Corporation

Ultra Petroleum Refining Complex Technologies and Systems

New, Existing and Future Units

Universal Technologies Corporation (UTC) has developed Technologies and Systems for reducing capital and operational & maintenance costs of existing and new Petroleum Refining Units. UTC Technologies have no impact on the licensed process technologies and their respective unit operations.

UTC Technologies

- Energy Mapping Technology (EMT)
- Gravity Application Technology (GAT)
- Dynamic Integration Technology (DIT)
(Multi-Dimensional System)
- Spiral Power Technology (SPT)

At least 15 - 20% of the capital costs can be reduced for each unit. Furthermore, with the incorporation of UTC's Infrastructure Matrix Technology (IMT), another 15 - 20% of cost savings can be achieved for the entire Petroleum Refining Complex.

The Technologies and Systems for Future Petroleum Refining are currently available.

Technologies Only Offered by Universal Technologies

Imagination is the Limit
